

I write to urge you to reject the Notice of Proposed Rulemaking #02-230, which would limit the functionality of digital television sets. As currently constructed, this •broadcast flag• proposal would hamper innovation in digital televisions and other electronic equipment capable of receiving digital broadcasts.

The broadcast flag proposal before the commission was the product of the •Broadcast Protection Discussion Group,• an select group of industry insiders who brokered the deal. It would be unfortunate if the FCC were to codify this pact at the expense of consumer flexibility and choice.

While piracy is a valid concern, it is not the only issue that should be considered. Entertainment industry protections must be weighed against consumers• freedom to purchase and employ technology to enhance and utilize content. If enacted, the broadcast flag proposal would ignore these concerns and turn technological development over to an all-powerful subset of the entertainment industry.

I want the ability and the right to purchase electronic devices that will allow me to make a personal recording of any program that I can edit and then replay after removing objectionable matter. Only I can make the decision of what portions of a program is suitable for my family viewing - certainly not the broadcast industry.

Your help in resolving this issue is appreciated.
